Hall’s True-to-Name Plants are Sure to Grow and Produce Big Crops

J. KEIFFORD HALL
SMALL FRUIT SPECIALIST
REIDS GROVE, MD.

I have unsurpassed facilities for prompt and safe shipment to all points, and I always secure the lowest rate possible.
Friends and Customers

This is my 18th year I have been sending greetings to the small fruit grower through my book. All of these years I have tried to be of service to my customers and friends. In a measure I have succeeded, for two reasons: First—I have many old customers that have bought year after year and are still buying. Second—The increase in my business has been due to the recommendations of my friends and customers, which is gratifying.

I take this opportunity to thank every customer and friend. I cannot see everyone personally, I wish I could.

I am just as anxious as you are that you get good stock when you place an order with me. If I did not care and you did not get what you expected then you would not want to buy of me again. I could not expect you to. I do care and that is why my business and customers have grown.

If you have not been buying from me, give me a trial order this spring and be convinced that Hall’s plants are as good or better than some others who claim so much for their stock. My stock is not superior to all others but I do claim it is just as good as any.

Give me part of your order if you are a new customer and try my plants along with any others. A trial is all I ask for.

I trust my friends and customers will make 1927 the best yet for me as well as for themselves.

I am Yours very truly,

J. KEIFFORD HALL,
The Small Fruit Specialist.

P. S. I want every customer a booster for Hall’s plants, etc. Let me make you one.
Please Read Carefully

I do not attempt to grow all varieties that are grown. I try to grow the ones that I can honestly recommend to the public. Please do not order plants that I have not listed unless you will allow me to substitute.

MY MOTTO. Once a customer, always a customer.

PARCELS POST. My mail package is light, and yet substantial that I can deliver plants to your door in perfect shape, and don’t believe there are any better plants to be obtained anywhere.

BY FREIGHT. I ship plants this way, but it is always with the understanding that it is at purchaser’s risk.

PAYMENTS MUST BE MADE IN ADVANCE. but orders will be booked and held, providing a remittance is enclosed with order, and when balance is paid order will be forwarded.

C. O. D. ORDERS, will be accepted and promptly filled, but when made out for large order, a part of the money must accompany order, or satisfactory reference given.

SUBSTITUTION. It is not always possible for us to have plants of all the varieties we have listed, late in the season, but if allowed we can often substitute a better variety and thus save time, which is very important. Please indicate in order if you object to substitution. If you don’t we will take it for granted that substitution is satisfactory.

REFERENCE. (By permission). Cashier Bank of Morion, Marion Station, Md., Postmaster Reids Grove, Md.

NURSERY INSPECTION. Copy of certificate attached to each shipment.

STRAWBERRIES Should be grown by every person who has a rod of ground. They can produce on almost any soil, and there is no fruit so delicious or healthful. If you had no strawberries on your table last year, don’t repeat the loss this season.

HOW BEST TO REMIT. By registered letter, bank draft, check to my order, postoffice money order or express order.

SHIPPING SEASON. In fall from September 1st to January 1st. Spring from February 1st to May 10th. It frequently happens that I can furnish plants to Southern customers all through the winter, note a time when the ground is not frozen.

CUSTOMERS. Your order, when received, will be shipped as prompt as possible. I am rushed at times, but will get your order out at first opportunity; I believe in prompt shipments.

I wanted to write you a good while ago but was so busy I did not get at it. The Horsey strawberry plants I got of you arrived in fine condition and they were packed fine. I planted them with some other plants I bought elsewhere. Your plants have made twice the growth the other plants did.

Yours truly, Wm. F. Zimmerman.
LOOK. I do not dig plants before order is received, in either spring or fall.

GUARANTEE. All plants are guaranteed to be true to name, and I will replace any plants found otherwise, but in no case will I be responsible for damage beyond first cost. Safe arrival of all plants sent by mail.

NURSERYMEN and DEALERS. Send me your Want List. If you want something that will please your customers, you need not go any further. I guarantee you a square deal.

Express shipments are not guaranteed.

SHIPMENTS BY PARCELS POST.

Plants of all kinds are now admitted to the mails as Fourth Class Matter. Maximum weight 70 lbs. in first zone, 50 lbs. in all other zones. I cannot give estimates on plants for some varieties are larger and weigh more than others. The best way is to let me ship your plants to you C. O. D. for the postage. I have been doing this and find that my customers are well pleased. It is much safer while the Express Companies are congested as they are. I will not guarantee anything by Express.

Packages of any considerable size will have to be shipped by express.

STOP, LOOK AND READ

When I get ready to fill an order for a customer the order is taken to the packing house and given to a man or men according to the size of the order, with labels, he or they go to the field with a digger and a bushelbasket, they dig the plants, lay them around the basket which is protected from sun and wind, when the basket is filled they are taken to a house to experienced women counters who count and tie them in bunches of 25 for 25. All small and undesirable ones are discarded, then they are relabeled and put aside until the packers get to them. I have found in this way that I have better plants and they are put up in better shape. It costs more to do it this way but this means satisfied customers.

When you read this and send me your order you will know how your order is to be handled. The house where the counting is done is a 8-room house each room being 12 x 16 feet. From the above you can see how careful I am to keep my plants from becoming mixed.

Quality your first consideration. There are a great many plant dealers some are selling plants that have had little experience in growing or fruiting them. It is your duty to know when you place your order who you are placing it with. I for my own self would prefer one that has had experience one who knows the habits of the different varieties, and one who knows what is best for the different localities, also know that the plants are true-to-name, free from disease and well rooted.

I have spent my whole life in this business. I make it a study day in and day out. I claim to be a specialist. Every order is given my personal attention.
STRAWBERRIES

DESCRIPTION OF VARIETIES

HORSEY

THE GREAT EARLY STRAWBERRY

HORSEY. (Perfect). I am still heading my list with this great early berry. I am not going to change the description. I could not make it any better since it has been tested over such a wide area and found to be even better than I claimed it to be.

IT is Known as The Best Extra Early Frost-proof Berry. The reason for this is that in 1920 and 1921 when practically all early varieties were killed by the late frosts Horsey stood the test and produced from 90 to 95 per cent of a crop of perfect berries; not seedy ends, coxcombed and one sided. Shape oblong, taper but not real sharp. When packed they are beauties. Firm and will ship anywhere. It is earlier than Premier. The fruit brings highest market price. Plants very large, strong, healthy growers, entirely free from any disease. Color a deep red that runs all through the berry; sour. The calyx is large and dark green which adds to its beauty.

It is a good plant maker when planted early. It is unlike most varieties in that it does its growing in the hot summer months, when fall begins to come on it begins to take root early which insures a deep massive root system which is so much needed to produce its heavy crop. It is a very strong bisexual variety and will make a good pollenizer for imperfect varieties.

If you have tested Premier you know it is a heavy cropper. I claim the Horsey will produce as many quarts per acre as Premier. Some of my customers claim it will produce more. The premier ripens over a long period where the Horsey ripens its crop quickly. It is harvested and you have your money before the market is glutted.

Plant Horsey for your early variety and be the early bird

COOPER. (Perfect). I fruited this berry in 1926 for the first time. I was more than pleased with it. The plants are very large and strong with long fibrous roots and make a good growth. The berries are very large and remain so through the whole fruiting season; the quality is so good that when you eat one you will want another. For home use or local market it is valuable. Medium early, good plant maker, color light red. Am only sorry I did not plant more of them myself.

EATON. (Perfect). I fruited this new berry last season for the first time and like the Cooper I am well pleased with it. It is a few days later in ripening than the Cooper; good maker of medium size plants which produce a fine crop of good berries, they are not quite as large as Cooper but large enough; very firm and when picked show up beautifully in cups. I have never tested out two berries that I like better than Eaton and Cooper so far. Give them a trial.
THE BEST. It surely has the right name, if I know anything about a late berry. It is the Best I have tested. With me last season, I saved only a few plants for testing; the fruit was large, firm, large double-cap, which when packed, was beautiful. It was later than Lupton with me, heavier cropper than Lupton or Gandy. It is a good grower of large plants, deep-rooted, resembles Gandy, but far better. I certainly like it and advise planting it as soon as as you can get the plants. I am limited myself, on plants. If you want any, you had better order early or else write me before ordering.

LUPTON. (Perfect) Hails from New Jersey. It is a great favorite as a late berry, very large, as firm as Klondyke, more productive than Gandy or Chesapeake. In plant growth and vigor, it is as good as the best. I have fruited it two seasons and I can recommend it to all customers. The fruit is large, round, with large double green cap, which makes it very showy and brings the highest price in market. If you want a late berry, plant Lupton.

PREMIER. (Perfect) Early, begins to ripen with Klondyke. It is very large and remains large through a long season. It is very common to hear of Premier producing 250 to 300 bushels per acre of berries of the finest quality. The foliage is light green, a good plant maker, a flavor delicious. If you are looking for something for a garden to last over a long season, plant Premier. It is firm, but does not seem to carry well under refrigeration.

BRANDYWINE. (Perfect) Late. Fruit extra large and very firm. Has unequaled shipping qualities. It is standard variety the country over. Very productive.

NORWOOD. (Perfect) Mid-season. One of the very largest strawberries grown. Fruit bright red, of good quality. Does not do well south of Pennsylvania.

CHESAPEAKE. (Perfect). I really consider Chesapeake one of the best, if not the best, late strawberry. It will out ship and out sell any other variety. The berries are large and hold up their size well to the end of the season. It is delicious in flavor, firm enough to ship to distant markets, handsome in appearance, beautiful rich red color, uniform in shape and has a bright green cap, foliage remarkably healthy, rather a poor plant maker unless the soil is rich. I have found the earlier Chesapeake is planted in spring the better. They grow better and make better beds. I have never been able to grow enough plants to fill my orders. You had better place your order for Chesapeake early.

My Dear Mr. Hall: Fishing Creek, Md., December 11, 1926.

I feel that I owe to both you and the strawberry growers in general a word of praise for your High Grade Strawberry Plants. I have bought plants of you several times and have bought plants of other nurseries as well but your plants, of the same variety, made a better growth and produced more fruit than those bought elsewhere. I have decided when in the market again for plants that you will get my order. As for packing and shipping I do not think you can be beat. Absolutely satisfactory in every way.

Respectfully, Oscar Aaron.
SHARPLESS. An old and well known berry, especially desirable in home gardens. Fruit large and of excellent quality.

JOE JOHNSON, BIG JOE. (Perfect) Late. Ripens with Chesapeake. Fruit is firm and of large size, has a good flavor, no green tips, wonderfully productive; plants are strong growers, thrives on any soil that will produce strawberries. If you are not growing Joe Johnson, plant heavily of them this spring. You will not regret it.

WARFIELD. Berries glossy, dark red, rich, exceedingly juicy; very firm. Popular canning variety and a superior shipper.

MISSIONARY. (Perfect) Early. For the early market this variety is known as Queen, while Klondyke is King for the South. Both varieties are now being extensively planted all over the country. Fruit is large, firm, and beautifully shaped. Very productive.

EXCELSIOR. (Perfect) Extra early. One of the first to ripen. An old standard variety suitable to all sections of the country where strawberries can be grown.

NICK OHMER. (Perfect) Ripens between Parsons’ Beauty and Gandy, just at the time late berries are much sought for. An old standard variety. Fruit is very large and firm, a general favorite in any locality.

MASCOT. (Perfect) Late. Begins ripening about three days after Gandy first begins ripening. Fruit is very fine, and as large as any we know of. We have extensively planted this variety for fruiting purposes. It is a good one and has come to stay. Bears his crop of big, firm, red berries. Extensively planted in all strawberry sections of the country.

NEW YORK. (Perfect) Mid-season. A popular mid-season variety. Plants are large and healthy. Fruit very large and ordinary firm. Noted for producing extra crops on very poor soils. Extensively planted all over the northern half of the United States.

PRIDE OF MICHIGAN. Same as New York.

HUNDRED DOLLAR. Same as New York.

McKINLEY. Same as New York.

UNCLE JIM. Same as New York.

OSWEGO. Same as New York.

RYCKMAN. Same as New York.

CLIMAX (Perfect) Early. A very heavy yielder of very large, round berries, firm and a good shipper.

WM. BELT. (Perfect) Mid-season. Fruit is very large and firm, of a delicate flavor. Succeeds on a great variety of soils. A very good one.

Dear Mr. Hall: Bradley Junction, Fla., March 5, 1926.

I received the plants today and in good condition. I am well pleased with them.

Yours truly, H. M. Cravey.
SAMPLE (Imperfect) Medium late. Extensively planted throughout the North, Middle and Western States. Very productive of large well made berries, firm for long distance shipping. A standard variety.

PARSON'S BEAUTY (Perfect) Mid-season. A very strong pollenizer Fruit is very large, firm enough for long distance shipping. A good all-around berry. Extensively planted all over the country.

SUCCESS, (Perfect) Mid-season. One of the best mid-season varieties. Makes wonderful yields on any soil that will produce strawberries of any kind. Fruit is large to extra large, bright scarlet color; flavor is mild, sweet and rich; ordinary firm.

MARSHALL. (Perfect) Mid-season. A good plant maker of choice, strong, well-rooted plants; fruit large to very large, colored through and through, flavor as fine as one could wish; very firm and a good shipper. A standard variety.

AROMA. (Perfect) Late. Planted in all sections of the country, especially in the Middle West and Southern States. Fruit is very large, but not of the largest. Quality unsurpassed. Very productive.

EARLY OZARK, (Perfect) Extra early. The best early variety for the Northern half of the country. It is enormously productive of berries larger than Klondyke, of the Excelsior type, but twice as large and very firm. Plants are big and strong. A very good variety.

HAVERLAND. (Imperfect) Mid-season. Fruit very large and conical; plants strong growers. An old standard variety that has been tested for over a generation and is just as good today as it ever was.

TENNESSEE PROLIFIC. (Perfect) Mid-season. A well-known standard variety. Like Parsons' Beauty, succeeds over a great extent of the country. Fruit is large, bright red, ordinary firm. Very productive.

MICHAEL'S EARLY. (Perfect) Extra bright scarlet, conical—an old and popular variety and an excellent table berry of good flavor. Those who have a garden and want a few for eating purposes will do well to try it.

KLONDYKE. (Perfect) Of Southern origin. Production firm. Brilliant colored and famous on all markets as a re-shipper. Great plant maker. All commercial growers should plant it.

LADY CORNEILLE. (Perfect) Early. Fruit is large and well shaped, firm and a good shipper. Plants free from disease. Extensively planted in the South.

HOWARD 17. (Perfect) I have fruitied this variety and I cannot see any difference in any way from Premier. So if you have Premier, leave off Howard 17.

BUBACH. (Imperfect) Mid-season. An old standard variety well known the country over. Fruit extra large, bright red; foliage very strong, of dark green color. Very productive.

SENATOR DUNLAP. (Perfect) Early Mid-season. A reliable market berry. One that succeeds in all parts of the country. Very productive. Fruit is medium to large, very firm and attractive. Always sells for top prices.
GLEN MARY. (Perfect) Mid-season. Like Klondyke, a perfect flowering variety but not suited to plant with imperfect flowering sorts, as it only furnishes enough pollen for its own use. A standard variety throughout the North half of the country. Fruit is extra large, firm. Always brings top prices.

KELLOGG'S PRIZE. (Imp.) This new variety, introduced by Mr. Kellogg, of Michigan, seems to be just what we have been looking for, for a long time—that is, a good, imperfect variety. It has more good qualities than nine-tenths of the varieties that I have fruited. Good size, solid, heavy cropper, and a strong grower. I should judge that a field of this variety, fertilized with Joe Johnson, or Chesapeake, would be about the best of anything in strawberries. Be sure to try this one.

DR. BURRELL. (Perfect) This berry was originated by Dr. Burrell, who originated the Senator Dunlap, which has been worth millions to berry growers. He says it is a scientific cross of Senator Dunlap and Crescent. In plant growth it is a marvel. Its foliage is large and of a beautiful dark green. In the production of fruit it surpasses either of its parents. Its berries are large and beautifully formed. Color a deep glossy red, a trifle lighter than Dunlap. The meat is solid and rich, the berries are excellent shippers, and splendid keepers. The calyx is a bright green, seeds yellow. This is a strong bi-sexual variety and has a long blooming season, making it unequalled for a pollenizer for pistillate varieties.

Dear Sir: Pine Brook, N. J., April 28, 1926.
The plants you sent arrived in good condition and were fine. If I do not have good success with them it will be no fault of the plants. Thanks for prompt delivery, good plants and good packing.
Yours for future orders,
E. N. Van Duyne.

Dear Mr. Hall: Starke, Florida, March 16, 1926.
I received the Strawberry and Raspberry plants O.K. The strawberries are as fine as any I have ever seen. Thank you for prompt shipment.
Yours very truly,
F. J. Pattee.

Dear Sir: Starke, Florida, November 24, 1926.
The Strawberry plants arrived and are fine, handsome plants, not one poor one in the whole lot. We shall expect great things from them.
Yours very truly,
Mrs. E. L. Browne.

Dear Sir: Easton, Pa., January 17, 1927.
I sure am pleased with your plants ant treatment. You talk about strawberries—I had them. I was the first for the past two years to get home grown berries on the market and all fine sorted berries. I surely made out fine. The Best, a late berry, ran exceptionally nice. Large, firm fruit and lots of it. The averaged 24 berries to the box, the boxes being overfull and sold for 35 cts. per box. Some berries I am sure.
My Raspberries were also fine and bore in abundance. Sure am satisfied.
Truly yours,
Chas. R. Miller.
Fall or Everbearing Strawberries

A great many people think that the Fall or Everbearing Strawberries is a fake. If you were to happen here in September, October and even the first part of November, you would not say it is a fake.

You can set these plants in early spring and have fruit from them from August until the ground freezes. I mean to say lots of it, the same year. Every garden should have some of them in it. Don't forget to include some Fall Bearing in your order. You will be more than pleased. Wouldn't it be nice to have strawberries all summer and fall.

PROGRESSIVE. (Perfect) A genuine fall bearing. This is, without a doubt, the best one; plants of good size, deep rooted and makes as many plants as most of the standard varieties. The fruit is of medium size, dark red and the flavor is unsurpassed. To obtain best results, keep blossoms off until August 1st, then when they begin to ripen you will have something you will be proud of. The runners from the young plants bear a nice lot of fruit. Be sure and order some of these plants.

1017 MINNESOTA. Is truly a fall-bearer, very heavy cropper, fruit large and flavor delicious, in plant growth it ranks with the Senator Dunlap, plants very large; foliage dark green and tall, the leaves are very large. I have never seen as many good berries of the fall-bearing varieties and of as large size as I saw of the 1017 Minnesota this past fall. You will not make any mistake in trying them. I especially urge all of my customers to get a few of them anyway.

Dear Sir:

Plant City, Florida, January 1, 1927.

I have bought many thousands of plants from you every year and always found your plants a success. I hope to live to give you many more orders as your plants always reach me in fine condition.

I remain,

Yours truly,

J. McD. Bennett.

Dear Sir:

Catawissa, Pa., January 9, 1927.

The Horsey was fine and I am looking for a big crop this season. We sure had a big crop last year. They are the best for market you can get. I want more of them this spring.

Yours truly,

Wm. BLASS.

Dear Sir:

Marietta, Pa., January 10, 1927.

The Horsey and The Best Strawberry plants were all perfectly right, as planted and have fruited in an entirely satisfactory manner, being beautiful, large and plentiful and with high quality.

With best wishes for your success.

Sincerely yours,

E. M. Miley.

Asparagus Roots

When planting Asparagus roots, set four to six inches deep, and about 12 inches apart in the row, covering with only three inches of soil at first and filling the trenches as the plants grow.

PALMETTO. Of Southern origin; a variety of excellent quality; hardy, very large. All who have used it pronounce it very fine.

MARTHA WASHINGTON. This new Asparagus was sent out by the Department of Agriculture at Washington, as superior to all other varieties, on account of its freedom from blight and other diseases. It is claimed to be larger and more productive, than other kinds, and more satisfactory in every way. My plants are fine and large.

PRICES: One year, $1.25 per 100; $7.00 per 1000
Two year, $1.75 per 100, $10.00 per 1000

Prices on application for smaller or larger lots than quoted above.

Samples of one and two year old Asparagus sent upon request, of any variety.

Raspberry Plants

ST. REGIS (Red). 25 for 75c, 50 for $1.25, 100 for $2.25, 250 for $5.00, 500 for $8.00, 1000 for $15.00.

Dewberries

LUCRETIA. Is the best. Large, sweet, jet black, heavy cropper, very firm, good shipper, and a very profitable berry.

$1.00 per 25. $1.75 per 50. $2.50 per 100. $7.50 per 500. $15.00 per 1000.

Dear Sir: Ossining, N. Y., January 8, 1927.

Replying to yours of recent date in reference to "Horsey" strawberries purchased from you in the spring of 1925. Have found they will do all that you claim for them and that whosoever plants them will be satisfied customers for when they sell them once they will ask for them again.

Yours very truly, Martin C. Ridner.
Giant Himalaya Berry

FRUITS FOR FOUR MONTHS

This wonderful berry which is sometimes called Grape-Vine Berry, was recently introduced from the cold regions of the Himalaya Mountains. There are several different forms of it, but this one seems to be the only one of genuine value. It grows like a grape vine, making a growth of twenty-five feet, and can be trained to a trellis of any kind.

The fruit is large, black in color, almost coreless, and unsurpassed for eating picked fresh from vines or cooked, canned or preserved in any form. Plants do well in the hot, dry sections of the South and West and are making wonderful records in the middle, Northern and Eastern States.

This is certainly a most wonderful berry because the vines do not die down after fruiting, as in the case with other berries. It is perfectly hardy everywhere, there being no winter in the United States too severe to kill it. It has stood 20 degrees below zero, with no signs of winter killing.

It is valuable for city people or anyone within limited space who desire an abundance of luscious berries. Price of strong well rooted plants: 25¢ each; 3 for 50¢; 6 for 75¢; 100 for $8.00.

I will allow a 5 per cent. discount on all orders sent me before March 1st, when full amount of cash is sent with order for future shipment.

CUSTOMERS SHOULD PLACE ORDERS EARLY

While I have a good stock of plants of most varieties, if you wait until you need your plants you might not be able to get them, for I am liable to be sold out of the variety you want. I do know this—there is going to be a large demand for plants this spring, and if you do not place your order early you might not be able to get them. Every year I have to return many orders. I am warning you and if you send in your order late for plants and I am sold out, do not blame me. A word to the wise is sufficient. If you place your order the plants will be reserved for you.

FALL PLANTING.

I have been selling plants for fall setting for several years and my business has grown beyond expectations. I find that fall setting is growing in favor with a great many growers. Personally I think it a good thing, especially if you are growing them for "hill culture," you can set them out in September and October and get your crop next spring and you have saved a whole year of expense hoing, cultivating and pulling out weeds and grass. On the other hand if you are growing them under the matted row system, if you set them in the fall you will have them set and out of the way when your spring work is rushing you. Besides you are sure of a good stand and when they start off in the suring they will have longer to grow, which insures a heavy matted row of strong plants ready for next years crop.

When you receive this catalog and you do not want to order in the spring, keep it and when the fall comes just drop me a postal asking me for my fall price-list, which will be sent you at once. there is one thing that I want to impress upon you—it makes no difference if you order from "HALL" spring or fall you will get what you buy and that which will be true to name and free from disease.

Do not forget that I do not issue my fall price-list before Aug. 1st. I begin to ship plants Sept. 1st., for fall planting.

TRUE TO NAME—While I use every precaution to have all plants, etc., true to name (I believe I come as near doing this as anyone in the business), I will not be held responsible for any sum greater than the cost of the stock should any prove otherwise than as represented.

Please write when sending in your order the names and addresses of any acquaintances or friends who might be interested in, or buyers of, strawberry plants, and I will send you a few plants of some of the newer varieties for testing.
